## SCREENING, BRIEF INTERVENTION, & REFERRAL TO TREATMENT SBIRT WITH ADOLESCENTS

**\*\*\* Adaptable for online implementation \*\*\***

**DATE:** January 27, 2021

**TIME:** 9:00 a.m. – 1:00 p.m.

**LOCATION:** Virtual workshop delivered via Zoom

**Screening, Brief Intervention and Referral to Treatment (SBIRT)** is an evidence- based practice used to identify, reduce, and prevent problematic use, abuse, and dependence on alcohol and illicit drugs.

Through this **SBIRT with Adolescents** training, providers learn how to screen for substance use, reinforce healthy lifestyle choices, utilize the steps of the brief intervention, and facilitate referrals to appropriate treatment. SBIRT is brief, widely used in a variety of settings/roles, and benefits individuals at all levels of substance use (including abstinence).

The length of this training can be varied. Eligible participants will receive up to four (4) Category I/Category A continuing education credits.

*No partial credits will be issued.*

For CEU purposes, participants will be required to log in to Zoom using the full name they registered with. Participants are strongly encouraged to leave their video cameras on; attendees must remain interactive through verbal or typed participation throughout the training.
